Synopsis

The Earth lies shaken in the aftermath of a conspiracy. Some of the smartest minds on the planet have striven for and died in an effort to scour the skies of four vast alien satellites, but their success has brought a terrible vengeance down upon us. While alien agents stalk the Earth, a team of exhausted scientists and military outcasts struggle to fight them among a planet on the brink - the brink of plague, the brink of war, and the brink of an invasion larger than they can possibly imagine. But they have allies. Two of the alien agents have forsaken their homes, their families, and their very species to stop the greatest act of genocide any of them has ever known. They carry with them the knowledge we need to save humanity and take us into a new and marvelous age. But Lana and the remaining enemy agents are far from defeated. As they begin to reap havoc among the diseased and bereft, Neal, Ayala, and Barrett must find a way to achieve the impossible - by fair means or foul, they must unite the world's disparate nations. And they must do so quickly, for the Armada is fast approaching, and behind the great fires of their decelerating engines, the huge fleet is readying itself for war.

Fear the Survivors (The Fear Saga Book 2) by Stephen Moss This novel is a fantastic read for all those fans who love the scientific military novels that delve into both the description of the science behind the weapons and their deployment. It is also a novel for those who like those political thrillers that delve into the intricacies of diplomacy versus the high achievers who just want to see things

completed. And it has great suspense, as against this backdrop, we see almost indestructible forces working in the background to manipulate the Earth toward its own destruction. Well the destruction of all humans anyway. It would be preferable that atomic weapons not be used to destroy the very resource that brings the aliens here to conquer Earth. This novel also includes some elements close to cyberpunk with creations that are close to what we are familiar with in the Terminator franchise. All of this makes for the sound of an exciting novel and I have to admit that I did greatly enjoy the read. The problem for me is that there is much more than what I've mentioned and hardly enough room to contain it all. That means there were some decisions made about how to tell the story that in a small way limit the novel. At least it limits the novel for me. I have special needs in that I love character driven novels. This novel has plenty of characters and many of those carry over from the previous novel. The characters are quite complex, but the style of writing seems to come from an Omniscient third many times that drops to almost objective omniscient view other times (There is just enough subjective along the way to pull us away from objective though the Prologue seems to start out objective: or at least that's how I saw it).
