Customer Reviews

Great for beginners, it says level 2-3 on the front. I personally play clarinet and piano but bought this as a gift. The CD was what attracted me to this book because students can play along with the music instead of just "practicing". I thought it was a good price for a book that included the CD of accompanying music that kids actually know and like. I only subtracted a star because the item description wasn't as helpful as I would have liked and I was buying for a child I don't personally know. It was difficult to tell what the book's idea of "level 2-3" was without seeing more info or a sample page of music. Even a grade level might have been useful in the description, though I am unsure because different schools start band in different grades, not including homeschooled

children, which could be advanced.

My daughter loves this book and is excited to get started learning new music! She just started playing the trumpet in school and is already learning so much. This book will enhance her learning!

Great Book! wonderful selection of songs!
